Global Partnership for Telehealth

Presenter: Sherrie Williams
The State of Telehealth

Change is inevitable. Growth is optional.
The Hometown Health Solution

Diverse Uses of Telehealth Across Georgia and beyond

Zip Code = Healthcare Access
School Health+ programs have trickle-down effects that touch all parts of a school’s community and change it for the better.

School-Based Health Centers should allow students with health concerns to connect to a provider for:

- Acute illnesses (flu, earaches, strep)
- Chronic illness management (asthma, diabetes)
- Mental health services (medication management, therapy)
- Health education
• First school-based telehealth partnership began in 2009 with one school in Georgia.
• **GEORGIA:** 136 schools, 30 school districts
• **TENNESSEE:** 38 schools, 8 school districts
• **FLORIDA:** 12 schools, 1 school district
Patient Centered Care
School Health+ by the Numbers

**69%**
